Summary

Motivated Junior Backend Developer with hands-on experience in Python and Django, building real-world web applications. Skilled in developing REST APIs using Django REST Framework, implementing authentication systems, and working with PostgreSQL databases. Experienced in deploying projects and building scalable backend systems. Passionate about writing clean, maintainable code and continuously improving backend development skills.

Education

(Aug 2017 – Dec 2022)

**DIPLOMA IN ENGINEERING AT SHARAITPUR
POLYTECHNIC INSTITUTE**

(Feb 2015 – Dec 2017)

**UNITED ISLAMIA HIGH SCHOOL
MADARIPUR CITY**

Skills

- Python, JavaScript(Basic), Django, Django Rest Framework, REST API, JWT Authentication, CRUD Operations, API Design, SQLite, PostgreSQL, Neon database, Git, GitHub, VS Code, Postman, Render, Docker, Redis, WebSocket, Upstash
- Soft Skills:** Problem Solving, Good Communication Skills, Teamwork, and Time Management.

Projects

Django Task Manager

- Technologies:** Python, Django, DRF, JWT, PostgreSQL,
- Built full CRUD Task Management System user authentication
 - Task Priority & Status Tracking implemented
 - Integrated PostgreSQL for production
 - Responsive UI using TailwindCSS
 - Tested APIs with Postman & deployed live on Render

Live: View Project | GitHub

Django Blog Application

- Technologies:** Python, Django, DRF, JWT, PostgreSQL, TailwindCSS,
- Built full-featured blog application with CRUD operations
 - Implemented user authentication & permission-based access
 - Added Comment & Like/Reaction system
 - Search + Pagination APIs using DRF
 - PostgreSQL integration & deployment on Render

Live: View Project | GitHub

Django Real-Time Chat Application

- Technologies:** Python, Django, Django Channels, WebSocket, Redis, PostgreSQL, JWT, TailwindCSS, Docker, Render
- Real-time chat system with multiple rooms & private messaging
 - Online/offline status, typing indicators, and message seen/unseen implemented with Redis + WebSocket
 - JWT-based authentication for secure API access
 - Deployed on Render with PostgreSQL & Docker
 - DRF APIs for messages & rooms with user-based access control
